

Purolite® C100E

Purolite C100E is a high purity premium grade bead form conventional gel polystyrene sulfonate cation exchange resin designed expressly for the treatment of foodstuffs, beverages, potable waters, and water used in the processing of food. Its specification is such that it will exceed the relevant EEC requirements, and the resin is in compliance with the U.S. Food & Drug Administration Code of Federal Regulations section 21, paragraph 173.25; for use in the treatment of foods for human consumption. Its high bead integrity, excellent chemical and physical stability, and very low extractibles content play a large part in its successful employment in these areas.

BASIC FEATURES:

Application - Domestic/Industrial/Food grade softening - supplied in Na⁺ form - Potable Use

Polymer Structure - Gel polystyrene crosslinked with DVB

Appearance - Amber, clear spherical beads

Functional Group - Sulfonic acid

Ionic Form as Shipped - Na⁺

Total Capacity, Na ⁺ Form (min.)	1.9 eq/l (41.5 Kgr/ft ³)
Moisture Retention, Na ⁺ Form	46 - 50%
Particle Size Range	300 - 1200µm
<300 µm (max.)	1%
Uniformity Coefficient (max.)	1.7
Reversible Swelling Ca ²⁺ → Na ⁺	8%
Reversible Swelling, Na ⁺ → H ⁺ (max.)	10%
Specific Gravity	1.27
Shipping Weight (approx.)	800 - 840 g/l (50 - 52.5 lbs/ft ³)
Temperature Limit	120°C (250°F)
